

AITD, Assagao **Applying intelligence**

The department of computer engineering at Agnel Institute of Technology and Design recently organized a seminar titled, 'Artificial intelligence techniques and applications' for the computer engineering students of the pre-final year. Former senior scientist at the Bhabha Atomic Research Centre (BARC), Surendra Kamat, who was the speaker, explained how intelligent systems could play an important part in almost all aspects of our day-to-day life. He also emphasized that one needs to have a good understanding of psychology and cognitive science to design systems that should be able to think and act rationally.
